

The Right Show | The Right Information | The Right Place

February 25-27, 2009 | Salt Palace Convention Center | Salt Lake City, Utah

Early registration rates end January 16! For the best value register online for the **Full Registration package** before January 16, 2009. Register online at www.geoshow.info.

Reserve your hotel at the Hilton Salt Lake City Center. Room rates are \$169 for single or a double, \$184 for a triple, and \$199 for a quad. Call 877 776 4936 or +1 801 328 2000 to make a reservation. Reservation deadline: January 23, 2009.

"The Geosynthetics 2009 conference is sure to be a fruitful opportunity for the learning and advancement of geosynthetics technology and industry. It is a 'must-attend' for those organizations, individuals and companies that are serious about this continually emerging world of geosynthetics."

--Wally Moore, Managing Director - TenCate Geosynthetics, Europe, Conference Chair

THE RIGHT SHOW

The largest geosynthetics industry event in North America will explore important issues affecting water resources, mining, construction, and regulatory communities in the US, Canadian and Mexican markets. Geosynthetics 2009 will feature design, engineering strategies and cost-saving geosynthetics solutions. The conference theme is Hydraulic and Environmental Engineering, and the areas of focus include: Shoreline and water protection, conveyance and storage, mining, agriculture, aquaculture, temporary roads and drainage. Attendees will also have an invaluable opportunity to experience the Geosynthetics 2009 Exhibition: an active marketplace for the specification and trade of geosynthetic products and technology.

THE RIGHT TIME

As economic situations change, never before has it been so important to use geosynthetics in your projects. Attending Geosynthetics 2009 will afford you invaluable industry education, information about product use, trends, innovative applications and will put you in touch with top suppliers and industry experts. In addition, massive federal infrastructure spending is projected and Geosynthetics 2009 is the conference to learn more about those plans and network with influential industry officials.

THE RIGHT INFORMATION

Approximately 35 technical and educational programs will be offered at Geosynthetics 2009, including keynote lectures, technical paper sessions (featuring 78 presentations), workshops, discussion panels, student papers, short courses and live demonstrations covering all aspects of geosynthetic materials, research, performance, testing, design, engineering, construction, case histories and field experience highlighting the conference theme.

Special Sessions:

GRI-22 Conference, workshops and special sessions.

THE RIGHT PLACE

Hydraulic and environmental engineering are important topics today, and Salt Lake City, UT is located in the western center of the U.S. where the conveyance, storage and protection of water resources are critical infrastructure issues. The unique topography and mining industry presents engineering challenges that require solutions incorporating geosynthetic products, making Salt Lake City, UT an ideal destination for this conference.

WHO SHOULD ATTEND

- Geotechnical, environmental and civil engineers
- Project Designers
- Specifiers
- Government Regulators
- Landscape Architects
- Contractors
- Fabricators and Installers
- Manufacturers and distributors
- Researchers, professors and students
- Facility Owners

For the best value, register online by January 16, 2009. Seating is limited. Please register early. Discounts are available for government employees, students and groups of 3 or more attendees from the same company. Contact Tracie Coopet at tkcoopet@ifai.com for more information.
