PRESS RELEASE

Layfield Plastics Incorporated, a member of The Layfield Group of Companies, and CW Neal Corporation are pleased to announce the successful completion of Layfield's acquisition of the business assets of CW Neal Corporation. CW Neal has operations in Santee and Hollister, California and is recognized as a global leader in geosynthetic floating cover systems and as a California based fabricator and installer of geomembrane containment products and water control baffle systems. The business will continue to operate as "Layfield Environmental Systems Corp., dba CW Neal". Tom Rose, President of The Layfield Group, states that "CW Neal's international leadership position in floating cover systems and custom baffle products combined with Layfield's leadership position in geomembrane technology will create the synergies necessary for operation as a leading environmental solutions provider."

Layfield is a vertically integrated, ISO 9002 certified manufacturer and distributor of a diverse range of construction and environmental products. Layfield is proud to be celebrating its 25th year in business servicing our customers throughout North America. Please visit our website at www.layfieldgroup.com for further information on the Layfield Group of Companies and CW Neal.
